COLORADO STATE UNIVERSITY

The CSU Energy Institute presents:

Data Acquisition for Researchers

June 13th, 2024
1:00 - 2:00 p.m. MDT

Virtual presentation via Teams:
Passcode: xxxxxxxx

Christopher Lute
Research Engineer
CSU Energy Institute

The success of any research project depends on accurate, reliable data collection. This practical seminar will deliver guidance, tips, and best practices for low- and high-speed data acquisition.

Topics will include:

- Common instrumentation and signal types
- Wire and wiring methods for sensors and instrumentation
- Data acquisition hardware and software

Examples will be included that use NI LabVIEW software and NI CompactRIO hardware.
Example code will be shared after the seminar.

Pizza will be provided!
